

HD Fruit Orchard

MGDC Charar-i-sharief has developed an HD apple orchard (high colour apple varieties: Red lum Gala, Devil Gala, Geromine, King Roat, Grany smith challenger, Z1 etc.).The objectives that shaped its development are detailed below.

- Orchards offer a space for people (students) to learn from each other and from the nature, and a place in which training of traditional skills occur, such as pruning and grafting.
- Orchards are a place for celebration of diversity. Nourishing fruit trees offers much scope for celebration.
- Orchards in our educational institutions, housing estates, parks and commons, improve human wellbeing and making our habitats more pleasant places in which we live.
- Within the above contexts we believe students planning to make their careers in horticulture will benefit from HD fruit orchard.
