

Kitchen Garden

MGDC Charar-i-sharief has developed a kitchen garden with an aim to give students first - hand experience with olericulture. Also to enhance the knowledge of students regarding nutritional aspects of vegetables and harmful effects of junk food.

College Kitchen Gardens have many advantages; some of them are as under:

- College Kitchen Gardens are good for learning, they are highly practical and a direct form of education. Apart from practical skills in agriculture and horticulture, gardens are a living laboratory for the study of environmental issues and life sciences.
- Improve environment: Respect for the immediate environment begins at home - and also at educational institutions.
- Increases confidence in students: It is forum through which students can reach out to influence, engage their parents and neighborhood communities to promote sound environmental behavior.
- Gardens are helpful in reducing the negative impact of climate change: Plants, trees, vegetable and fruits play an important role in reducing the harmful effects of climate change.
- A place where students practically experience transfer of technology from laboratory to field.
